

The envisionCAM™ is a state-of-the-art vehicle mounted Video Event Data Recorder, which begins saving you money from the moment it is installed. It captures high definition video of accidents and aggressive driving before, during and after they occur. Downloaded wirelessly, this data allows the fleet manager to clearly understand what is happening in order to better train, maintain, and defend

The envisionCAM™ product will lower your fleet costs and save you more money than the cost of the product

Don't wait until an accident occurs before you equip your fleet with the envisionCAM™

NEVER pay monthly fees

30% reduction in car accidents

70% reduction in Taxi cab related robberies

95% reduction in wrongly accused accidents
